

The gist of my lecture

The program for honoring the NON JEWS, who risked their lives in order to save innocent victims, the Jews, during the Holocaust is unique.

We know about other wars and conflicts in the world.

But nowhere, you can find among the perpetrators, persons who will risk their lives, in order to save the victims.

From my experience, I learned that students in Japan, felt very proud, when I presented to them the heroic deeds of

CHIUNE SUGIHARA, who was awarded the prestigious medal and title of the Righteous among the Nations.

The stories about the Righteous gentiles are breathtaking.

Their message is a message of GOODNESS.

Young and mature people, must know that, even in the most difficult situations, ONE CAN HELP AND OPEN A DOOR to persecuted people. This is the most moral and educative message today.
